3 step recruitment process

Assessment procedure

- CV evaluation – screening and selection
- Reference checks
- Telephone interview with selected candidates
- The best candidates are invited for a personal interview including evaluation by a medical doctor, psychological tests and test of language skills. Interviews are captured in order to present candidates to you.

Presentation and Interview

- CV in standard format
- Interview notes – conclusions of candidate interview
- Presentation of candidate summary
- Selected candidates are invited for an interview with you where the final match is done and the contract is signed. This is also an excellent opportunity for the candidate to visit the future workplace, meet colleagues and learn more about life in the local community.

Relocation, integration and follow up

To ensure a fast and smooth relocation process we assist all candidates with the practicalities in connection with relocation: administration paperwork, professional registrations, accommodation, travel arrangements etc. Furthermore we follow up with you and the candidate after 1, 3 & 6 months to assure a successful integration.
